Changing Password using Account Management [GPv3]

Lu Parente - 2017-11-10 - in Account Management for Administrators

The **Account Management** section allows Administrators to change and update their current password.

Note: The Account Management section can be access directly from the **Options** menu in the GeoPro web app or by navigating to <https://account.geoprosolutions.com/> and entering your Administrator credentials.

1. To change your password, navigate to the **Manage Account** tab.

2. Select the **Change Password** tab and you will be presented with your account details and the ability to update your password.

EDIT ACCOUNT INFORMATION

3. Enter your current password followed by your new password. The password requirements will be displayed when entering your new password.

Current Password *

New Password *

Confirm New Password *

Save Password

4. Select **Save Password** when finished.
