Deleting Points of Interest from the Options tab [GPv3]

Lu Parente - 2023-03-20 - in How-To

Points of Interest (or POIs) allow Administrators and Monitors to mark specific location points on the map which other Administrators, Monitors or Users can view and may find useful. An Administrator or Monitor has the ability to define points of interests on the map which can be made **visible to all users** in the tenant or **only visible to the creator** or POI owner. A point of interest can also be given a description and unique icon and colour. Points of interest can be extremely useful for Monitors while assisting users with day to day logistics or even in emergencies.

This article explains how to delete a point of interest.

1. To delete an existing point of interest, navigate to the **Options** tab and select **Points of Interest**.

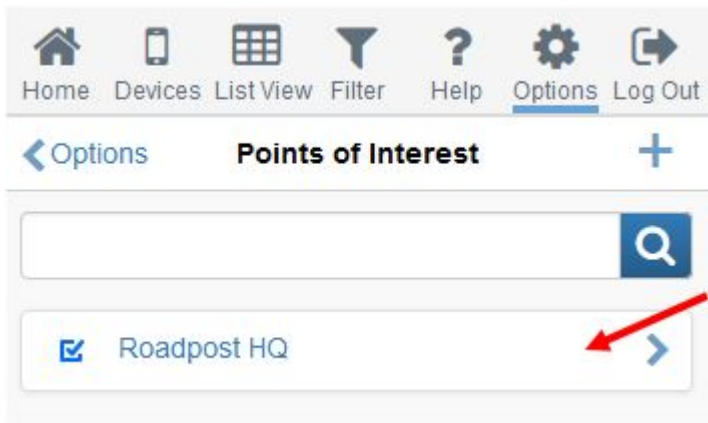

Options

- My Profile >
- Users >
- Groups >
- Global Address Book >
- Global Event Notifications >
- Global Canned Messages >
- Check-In Schedules >
- Synchronization Tools >
- Tracks >
- Geofences >
- Points of Interest >
- Account Management >
- Log a Support Request

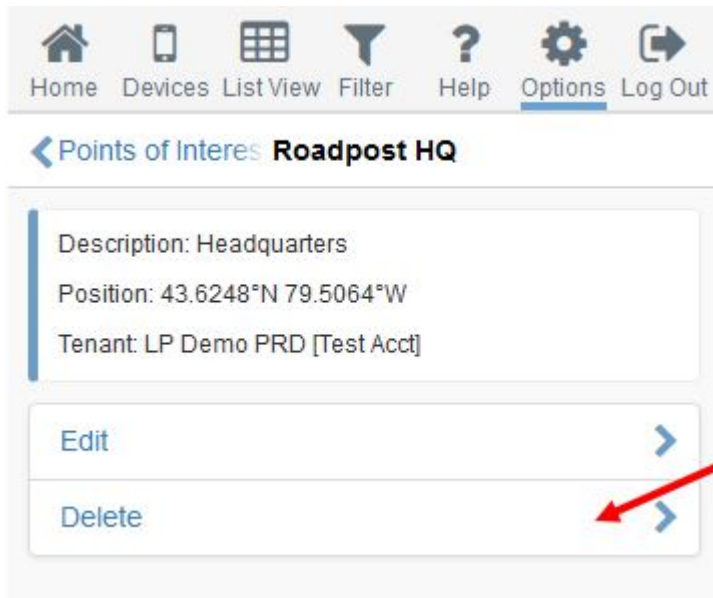

2. The Points of Interest page will be displayed. You now have the ability to **create**, **edit**, and **delete** your points of interests.

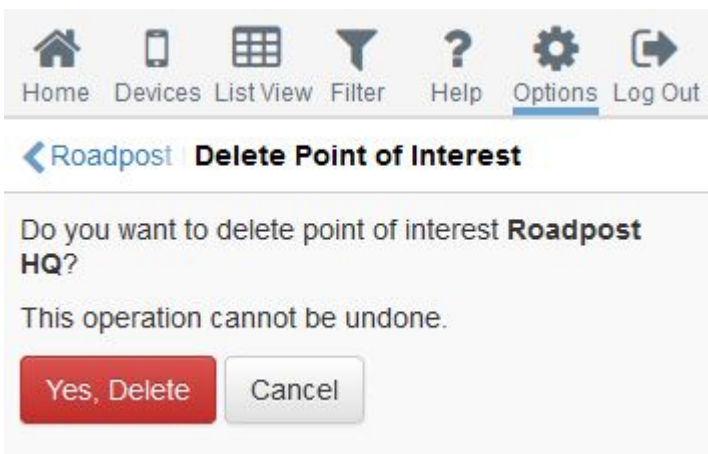

To delete a point of interest, select the one from the list.

3. The point of interest details page will be displayed. Select **Delete** to remove point of interest.

4. You will then be prompted to confirm the deletion of the selected point of interest. Select **Yes, Delete** to continue.

5. The point of interest will now be deleted.
