Options tab Overview for Users [GPv3]

Lu Parente - 2023-03-20 - in Options Tab

The **Options** tab provides Users with the ability to perform tasks such as view and modify **My Profile** details, view the **Global Address Book** to see which Global Contacts & Distribution Lists have been automatically synced to your device, download and install the **Synchronization Tool** for your device type, view your **Tracks** or breadcrumb trail, view **Geofences** created by your Administrator, manage your **Points of Interest** and **Log a Support Request** directly with Roadpost Technical Support.

Below is a short summary of what each of the menu options are used for on the **Options** tab.

Options
