Searching for Devices from the Devices tab [GPv3]

Lu Parente - 2015-09-29 - in How-To

The **Devices** tab of the GeoPro Web App provides a device search function. The device search is used to search for devices which can be comprised of device name, IMEI, or assigned users name.

1. Simply type in the **device name**, **device IMEI**, or **assigned user name** in the search box. The search will automatically display the relevant search results.
