Selecting a Device from the Devices tab [GPv3]

Lu Parente - 2015-09-29 - in How-To

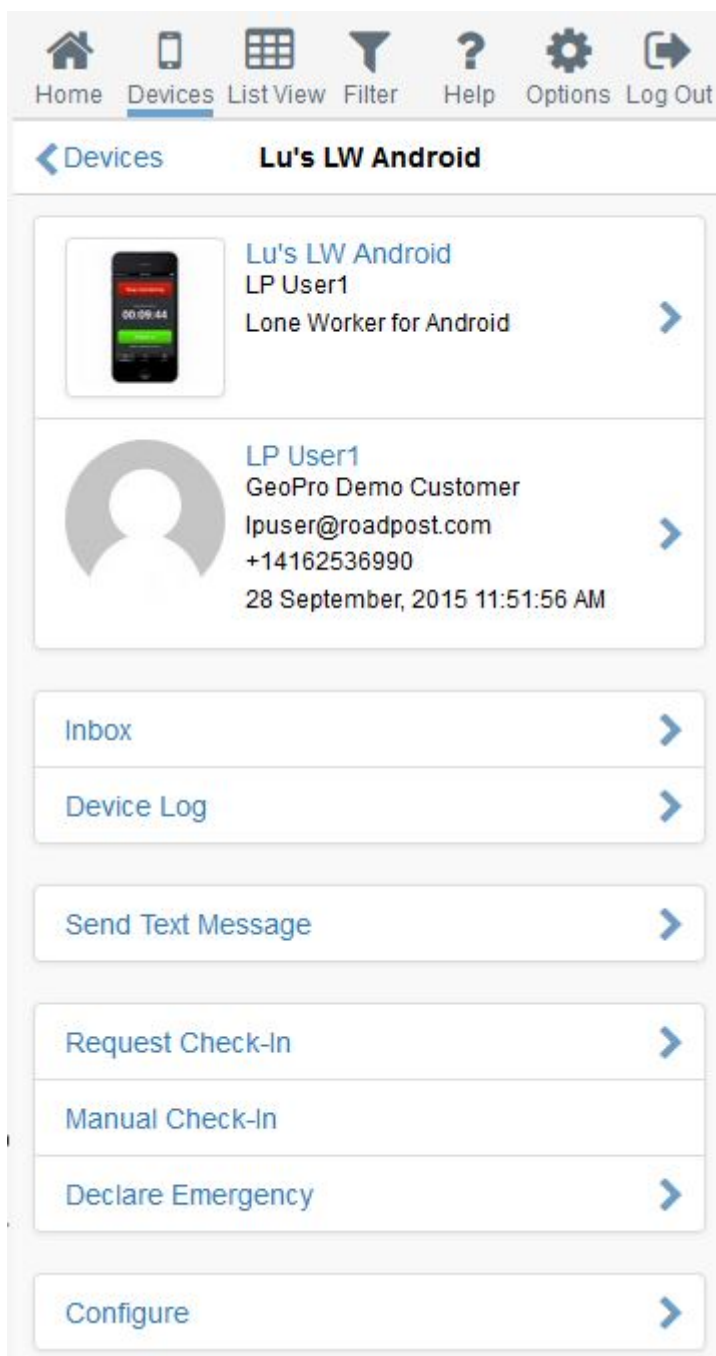

Selecting a device tile from the device list will navigate you to the device page and allow you perform a number of device related functions.

1. Start by selecting a device from the device list on the **Devices** tab.

2. You are now presented with the device page. From here you can view the **assigned user** and their

details, view the device's **Inbox** and **Device Log** and perform functions such as **Send Text Message**, **Request Check-In**, **Manual Check-In**, **Declare Emergency**.

3. By selecting **Configure** you can also view and setup additional **Device Details**, the **Address Book**, **Event Notifications**, and a **Check-In Schedule** for the selected device.

Note: Event notifications are view only at the device level. Event notifications can be configured by navigating to **Options** followed by **Event Notifications**.
