## Viewing GeoPro Mobile App My Info Updates in the Device Inbox of the GeoPro Web App

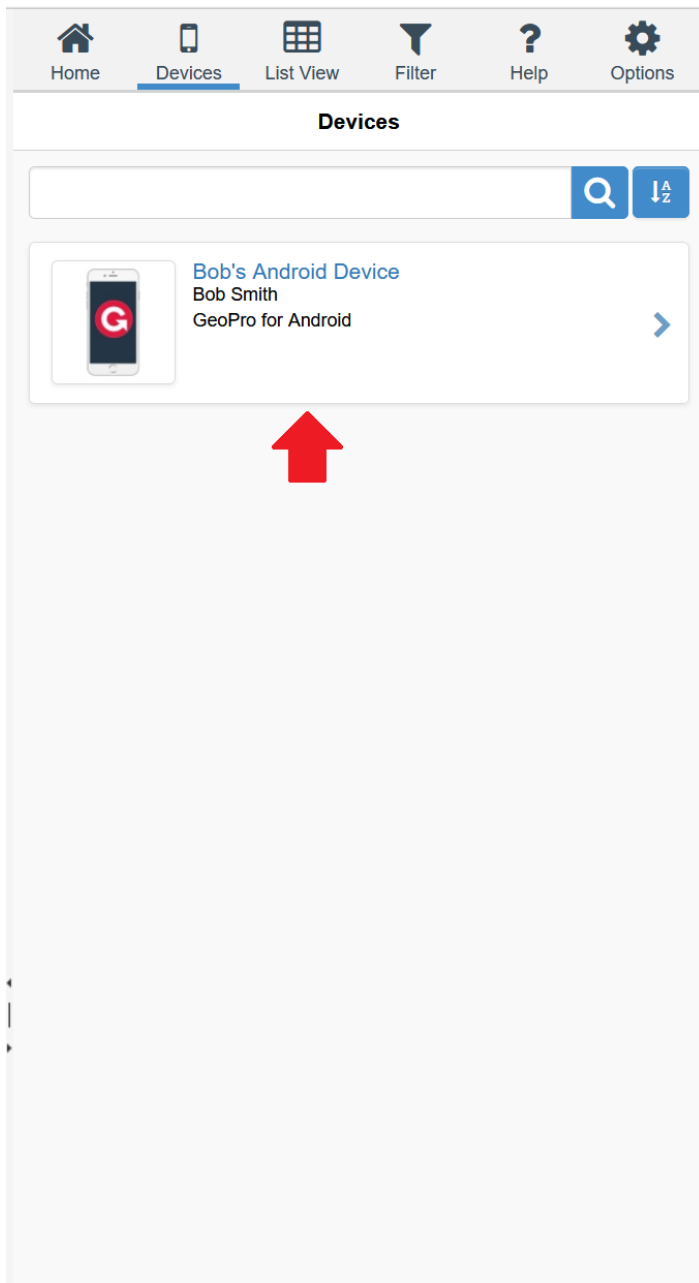

Gabor Jozsa - 2020-11-05 - in Web App for Monitors

The My Info feature enables a GeoPro Mobile App User to complete a predefined form and submit their responses to their GeoPro Inbox. By default the Mobile App will be preprogrammed with standard forms designed to capture the Mobile App User's health status and Fit for Duty status, however My Info forms can be fully customized by the GeoPro Administrator for the account.

Once a My Info form is completed and updated by the Mobile App User the information submitted is recorded in the User's Device Inbox.

To view the completed form in the Device Inbox:

1. From the **Devices** tab select the device.

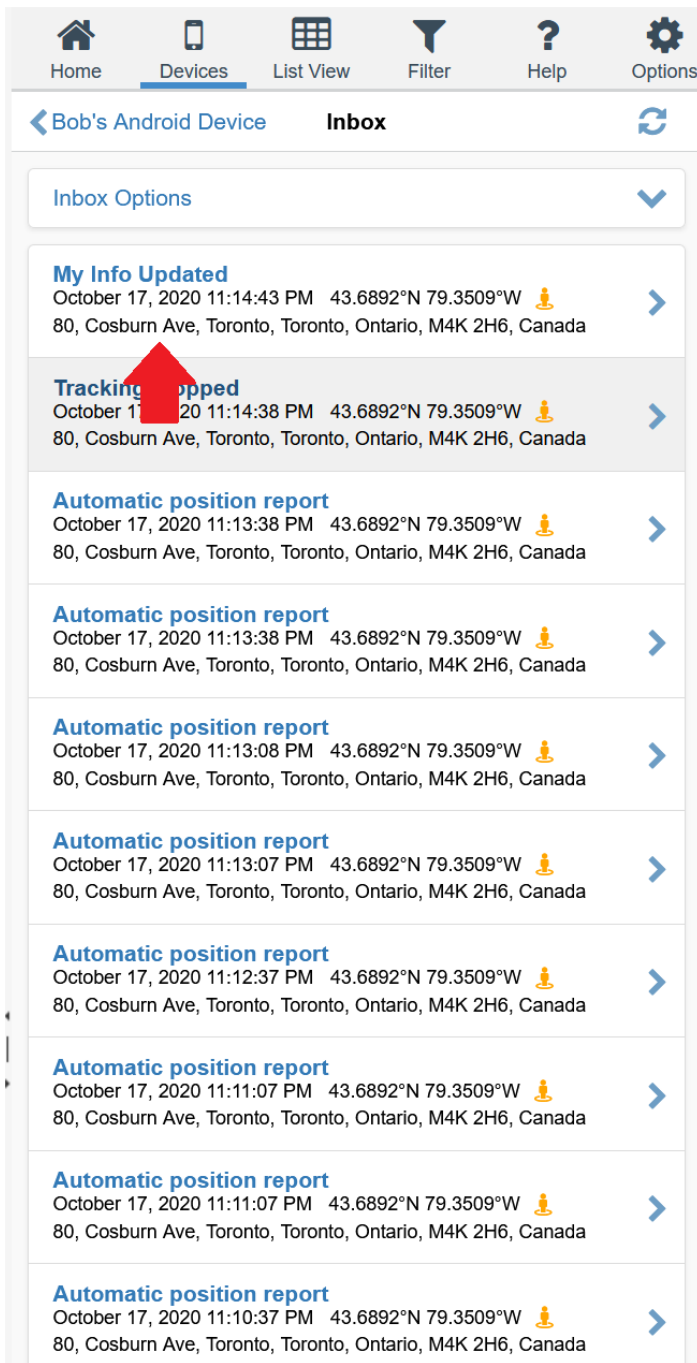

2. Click on **Inbox**.

The screenshot displays a mobile application interface with a top navigation bar containing icons for Home, Devices, List View, Filter, Help, and Options. Below the navigation bar, the title "Bob's Android Device" is centered. The main content area is divided into several sections:

- Device Information:** A card showing a smartphone icon with a red 'G' logo, the name "Bob's Android Device", the user "Bob Smith", and the device type "GeoPro for Android".
- User Profile:** A card with a grey silhouette icon, the name "Bob Smith", the role "Bob's Tenant", email "gabordjzsa+005@gmail.com", phone number "+16472928792", and a timestamp "May 6, 2020 5:20:05 PM".
- Inbox:** A list of items with right-pointing chevrons:
  - Inbox
  - Conversation (highlighted with a red arrow)
  - Device Log
  - Alerts
- Send Text Message:** A button with a right-pointing chevron.
- Request Location:** A button with a right-pointing chevron.
- Request Check-In:** A button with a right-pointing chevron.
- Manual Check-In:** A button with a right-pointing chevron.
- Declare Emergency:** A button with a right-pointing chevron.
- Configure:** A button with a right-pointing chevron.

3. Click on the **My Info Updated** entry in the Inbox to view additional details.

The My Info field responses will be presented in-line with other relevant device information such as location and connection status.
